01 Brand Foundation

Who we are, what we stand for, and how we're positioned

> **One-liner:** Harmonix is the first HL-native on-chain hedge fund — bringing professional-grade yield strategies to anyone, with full transparency and no trust required.

MISSION

Minimize risk. Maximize yield. Make institutional DeFi strategies accessible to every wallet.

VISION

Become the strategic liquidity layer for the Hyperliquid ecosystem — the yield backbone builders and users rely on.

CORE VALUES

Transparency. Security (SAFU). Precision execution. Community-first. Builder mentality.

Brand Personality

WE ARE

Confident but not arrogant · Technically credible · Builder-minded · Transparent about risk · Community-aligned · Calm during volatility

WE ARE NOT

Hype-chasing · Overpromising · Aggressive/clickbait · Dismissive of competitors · "GM/GN" culture without substance

Audience Personas

🎯 DEFI YIELD FARMER

Understands funding rates, delta-neutral, APR vs APY. Wants numbers + on-chain proof. Speaks in data.

🔷 HYPE HOLDER

Bullish on Hyperliquid ecosystem. Wants to put idle HYPE to work. Less technical, more narrative-driven.

🏗️ BUILDER / KOL

Wants collab opportunities, ecosystem alignment, and credibility signals. Looks for originality over noise.

02 Tone of Voice

How we sound across every post, thread, and announcement

Harmonix's tone is **clear, direct, and credible**. We lead with context before numbers. We explain the "why" before the "what." We sound like a sharp builder — not a marketer.

The 5 Core Tone Principles

1. **Context-first.** Always explain why something matters before dumping metrics. "Funding rates hit 0.09% — here's what that means for vault holders" beats a naked APR screenshot.
2. **Confident, not loud.** No excessive caps, no "MASSIVE" or "INSANE" for routine announcements. Let the product speak.
3. **Transparent by default.** Share buyback wallet addresses. Show on-chain data. Acknowledge risks. This is what sets us apart from anonymous protocols.
4. **Human and warm.** Community are users first, not "degens." Treat them like smart adults who deserve real information.
5. **Precise language.** Delta-neutral means delta-neutral. Don't conflate APR and APY. Don't call something "risk-free." Use correct terminology at all times.

Do vs. Don't — Real Examples

✓ DO	✗ DON'T
"The Protection Vault expires March 21. Your HAR is safe above $0.0046. Here's what happens on expiry day — and how to keep earning →"	"🚨 VAULT EXPIRY ALERT 🚨 YOUR TOKENS ARE EXPIRING!!! TAKE ACTION NOW!!! 👇👇👇"
"We've been placing limit buy orders for HAR across 4 buyback wallets since launch. Total accumulated: X HAR. Proof on-chain →"	"The team is committed to the long-term success of HAR 🙏 We will always support the price 💪"
"Staking APR breaks down as: 10% in HAR + 15% in HYPE for the 6-month lock. Here's the math if you deposit 100K HAR →"	"MASSIVE APR INCOMING 🚀🚀 Don't miss the best yields in DeFi!! Aping now is a no-brainer 🤑"

> **Context rule:** Every announcement post must answer: (1) What is happening, (2) Why it matters to the reader, (3) What they should do next. In that order.

03 Writing Style

Grammar, structure, formatting, and thread mechanics

THREAD / LONG-FORM POSTS

Open with a hook (1–2 lines, no emoji overload). Use numbered bullets for lists. Keep each tweet under 200 chars when possible. End with a clear CTA — link, tag, or question. 5–8 tweets is the sweet spot for threads.

ANNOUNCEMENT POSTS

Lead with the product name and action word. Use one primary emoji max in the header. Include one on-chain link or screenshot. Close with the app link. Avoid bold formatting within tweets — structure via line breaks instead.

Vocabulary Standards

USE THIS	NOT THIS	REASON
Delta-neutral vault	Neutral vault / hedge vault	Precision — we use industry-standard terminology
APR	APY (when rates aren't compounded)	Accuracy — don't inflate yield presentation
Deposit / Restake	Ape / YOLO	Professionalism — we are not a meme protocol
HAR / HYPE rewards	"Free money" / "guaranteed gains"	Legal/trust — never imply guarantee
Community / Users	Degens (in official comms)	Respect — though acceptable in casual Discord/TG
Vault capacity	"Slots left" / "limited spots"	Accuracy — capacity is TVL-based, not slot-based
Hyperliquid	HL (in first mention)	Clarity for new audience members

Emoji Usage

Emojis are allowed but restrained. Use at the *start* of a line or tweet as a bullet marker (→ · ▸). Avoid stacking 3+ emojis. Rocket (🚀) and money-bag (💰) emojis are overused in DeFi — use sparingly or avoid in formal announcements.

> **Approved emoji set:** → · ▸ ✅ 🔵 🟢 📊 📈 🔒 ⚡ 🛡️ 🧩 🌐
> **Avoid overuse:** 🚀 🔥 💰 🤑 💎 🙌 👀 (use max once per thread, not in every post)

04 Banned Topics & Hard Rules

What we never say, post, or imply — no exceptions

- ✕ **Price predictions / price targets.** Never state or imply what HAR, HYPE, or any token "will" reach. No "HAR is going to $X" even as speculation. This applies to all team accounts.
- ✕ **Guaranteed returns.** Never use "risk-free," "guaranteed APR," or "100% safe." Always include that DeFi carries risks. Vault yields are variable and market-dependent.
- ✕ **FUD about competitors.** No negative posts about other protocols by name. We compete by building better, not by tearing others down. Comparisons must be factual and non-attacking.
- ✕ **Unverified on-chain claims.** Never post stats, TVL, buyback numbers, or APR without a source link or on-chain proof. All numbers must be verifiable.
- ✕ **Urgency manipulation.** No "last chance," "selling out in 24 hours," or FOMO-baiting around vault capacity unless the data is factually true and the claim is precise.
- ✕ **Giveaway/airdrop farming language.** Don't post "like + RT to earn HAR" or similar engagement-bait. Community growth should be organic and value-driven.
- ✕ **Political or divisive content.** No political commentary, memes, or content unrelated to DeFi/Hyperliquid ecosystem. Keep the feed on-mission.
- ✕ **Non-attributable screenshots.** Never post performance screenshots without date, context, and source. Out-of-context PnL screenshots undermine credibility.
- ✕ **Token hype without substance.** Posts like "HAR is the most undervalued token in DeFi 🚀" with no argument are off-brand. Claims need backing.
- ✕ **Speculating on other protocols' internal issues.** No commentary on competitor exploits, hacks, or controversies unless directly relevant to our users' safety.

> **Legal note:** Harmonix operates in a regulated gray area. All content should be framed as educational/informational, not financial advice. Add "Not financial advice. DYOR." when sharing yield or strategy content, especially on threads.

05 Color System

Official brand colors for all visual assets and graphics

Primary Palette

Harmonix Green	Deep Black	Card Surface	Off-White Text
`#00D084`	`#0A0F0D`	`#141C18`	`#E8F5EE`
PRIMARY	BACKGROUND	SURFACE	BODY TEXT

Secondary / Status Palette

Accent Green	Alert Red	Caution Yellow	Muted Green
`#00FF9F`	`#FF4D6D`	`#FFD060`	`#7A9A88`
HIGHLIGHTS	WARNINGS	CAUTION	SECONDARY TEXT

> **Usage rules:** Harmonix Green (#00D084) is the dominant accent — use it for CTAs, data highlights, and logo. Never place green text on a white background. All backgrounds must be dark. Do not introduce new brand colors without approval.

06 Typography

Approved fonts for all marketing materials and graphics

Display / Headlines Space Grotesk · 700 · 28–48px	**Minimize Risk. Maximize Yield.**
Section Titles Space Grotesk · 600 · 18–24px	Delta-Neutral Vault — 80% APR
Body / Content Inter · 400 · 14–16px	Harmonix vaults use institutional delta-neutral strategies to generate yield in all market conditions.
Data / Numbers Inter · 700 · 20–36px · Green	**$46.5M TVL · 80% APR**
Labels / Tags Inter · 600 · 10–12px · ALL CAPS	PROTECTION VAULT · EXPIRES MARCH 21
On-chain / Code Monospace (system) · 13px	`0xBc76Ef781235ed6d9e58e566dD07fdB32b6bEF04`

> **Fallback fonts:** If Space Grotesk isn't available, use *DM Sans* or *Satoshi*. For body text fallback: *system-ui* or *-apple-system*. Never use Comic Sans, Impact, or decorative fonts.

07 Content Scoring Framework

How to evaluate whether a piece of content fits Harmonix — before publishing

Rate each post on 5 criteria (1–5 each). A total score of **18+ = publish**. Score of 14–17 = revise first. Below 14 = reject or rethink from scratch.

CRITERION	5 (EXCELLENT)	3 (ACCEPTABLE)	1 (REJECT)
Relevance Does it connect to Harmonix's product, ecosystem, or user needs?	Directly tied to vault, HAR, HYPE, or Hyperliquid ecosystem	Broadly DeFi relevant	Unrelated to protocol or ecosystem
Credibility Are claims backed by data or on-chain proof?	On-chain link + verified number	General claim, verifiable in principle	Unsubstantiated or speculative
Tone Fit Does it match our confident-but-calm voice?	Clear, direct, context-first	Acceptable but slightly off-brand	Hype-bait, clickbait, or overpromising
User Value Does the reader learn something or have a reason to act?	Clear takeaway + CTA	Informative but no clear action	Pure self-promotion, no value add
Timing Is this the right moment to publish this content?	Tied to live event or market moment	Evergreen, any time is fine	Off-timing, creates confusion or noise

Content Type Scoring Reference

CONTENT TYPE	TYPICAL SCORE	VERDICT	NOTES
On-chain buyback transparency post	24–25	PUBLISH	Best-performing format. Always with wallet link.
Vault launch + APR breakdown thread	22–24	PUBLISH	Lead with user benefit, then numbers.
Roadmap / milestone post	20–22	PUBLISH	Add specific dates when possible.
Funding rate market commentary	18–21	PUBLISH	Best when tied to current vault opportunity.
Community AMA announcement	17–20	PUBLISH	Include agenda to drive attendance.
Generic "DeFi is the future" take	12–15	REVISE	Too broad. Tie it specifically to Harmonix angle.
Token price speculation / moon post	4–8	BANNED	Violates tone rules. Never post.
Competitor FUD or attack	2–5	BANNED	Hard rule. Never post.

08 Platform-Specific Guidelines

How tone and format adapt across different channels

𝕏 TWITTER / X

Voice: Confident, punchy, technical. Threads for depth, single tweets for announcements.

Format: Hook in first 2 lines. Numbered lists. Max 1–2 CTAs per thread.

Frequency: 1–2 quality posts per day. Don't post just to post.

Engagement: Reply to ecosystem builders and HL-native accounts. Quote-tweet with added value, not just "🔥".

📣 TELEGRAM (CHANNEL)

Voice: Direct, operational, low-noise. This is where users get facts fast.

Format: Short. Bold key numbers. Always link to app or on-chain source.

Use for: Vault events, APR changes, expiry reminders, protocol updates.

Avoid: Memes, engagement bait, off-topic content.

💬 TELEGRAM (GROUP CHAT)

Voice: Warm, human, community-first. Casual is OK here.

Tone: You can be more relaxed, use "degens" affectionately, and engage with humor.

Rules: No price predictions from team. No FUD amplification. Address complaints directly and with data.

🖊️ MIRROR (LONG-FORM)

Voice: Analytical, authoritative, publication-quality.

Use for: Thesis pieces, strategy explainers, roadmap deep-dives, ecosystem reports.

Format: 800–2000 words. Use headers. Always include on-chain data references.

Tone benchmark: "We built this because..." narration with data to back it up.

Discord

Discord is for power users and builders. Keep #announcements clean and formatted (same standard as Telegram channel). Moderators should redirect price-talk to designated channels. AMA transcripts should be shared as Mirror posts. Feature requests and bug reports should be pinned and acknowledged within 24 hours.
